Handover note

> Demonstration package built from synthetic data.

Client: Demo Client · **Engagement:** DEMO-0002 · **Final run:** `pr_20261111T175825Z_7970c9`

1. Open this first

`00_START_HERE` opens with one click in any browser and holds everything below. Nothing has to be installed.

If you are	Start with
The CIO	One-page summary
The risk committee	Presentation, with speaker notes
The specialist	Report
The analyst who checks numbers	Workbook (Control panel first)
Whoever wants to explore	Dashboard
The auditor	Methodology

2. What was handed over

9	BI exports for Power BI / Looker Studio	`BI_Exports/ (CSV, long format)`

3. Who does what

When	What	Who
This week	Decide on the trim and record the decision	Portfolio manager
Next meeting	Review the limits close to their ceiling	Risk committee
Each month	Rerun with the new holdings and compare with the last run	Risk manager
Each year	Review the limits and the stress scenarios	Risk committee

4. How the files work together

- The **dashboard** tries a trim or a market move before anyone places a trade.
- The **presentation** has speaker notes on every slide, and its charts can be edited in PowerPoint.
- The **workbook** recalculates: choose an asset class in the yellow cell of the Control panel.
- Editing the Excel and PowerPoint files needs Office, or a free tool such as Google Sheets and Slides. Reading them does not: both are inside `00_START_HERE`.

5. What we need for the next run

Holdings and prices for the new date, any change in the limits, and any new instrument type.

6. Data and access

All client data will be deleted within 10 business days of the end of the engagement (or retained for the next run as agreed).
